WORK EXPERIENCE

Frontend Developer — Streamline UI, 2021–Present

- Built component library in React with TypeScript, cutting UI development time by 40%.
- Migrated legacy jQuery codebase to React 18 with Redux state management.
- Wrote Jest unit tests achieving 85% coverage across all React components.
- Integrated GraphQL API with Apollo Client, replacing REST API Design patterns.

Junior Web Developer — ByteForge Labs, 2019–2021

- Built responsive landing pages with HTML, CSS, and vanilla JavaScript.
- Adopted Tailwind CSS and SASS for consistent design systems.
- Set up Webpack bundling and GitHub Actions CI/CD pipeline.

EDUCATION

B.Sc. Computer Science — University of Toronto, 2019

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks: React, Next.js, Vue.js, Node.js, Express.js

Styling: Tailwind CSS, SASS, CSS Modules

Tools: Git, Webpack, Jest, Redux, GraphQL

PROJECTS

Portfolio Dashboard

Personal finance tracker built with Next.js, TypeScript, and Tailwind CSS. REST API Design backend in Node.js.

Open-Source Component Kit

50-component React library with full Jest test suite, bundled with Webpack and published on npm.
